

Homework 4

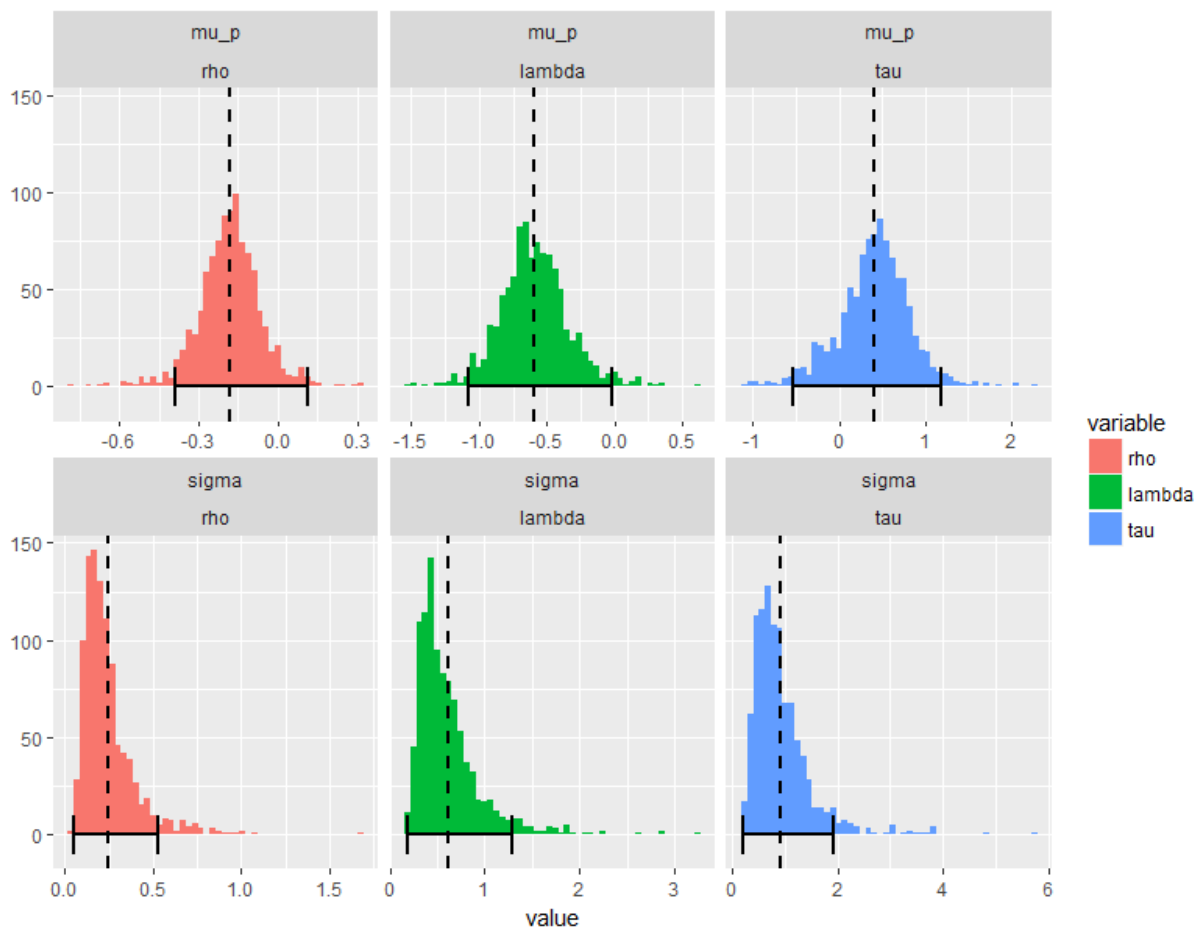

DY
2018/ 5/17

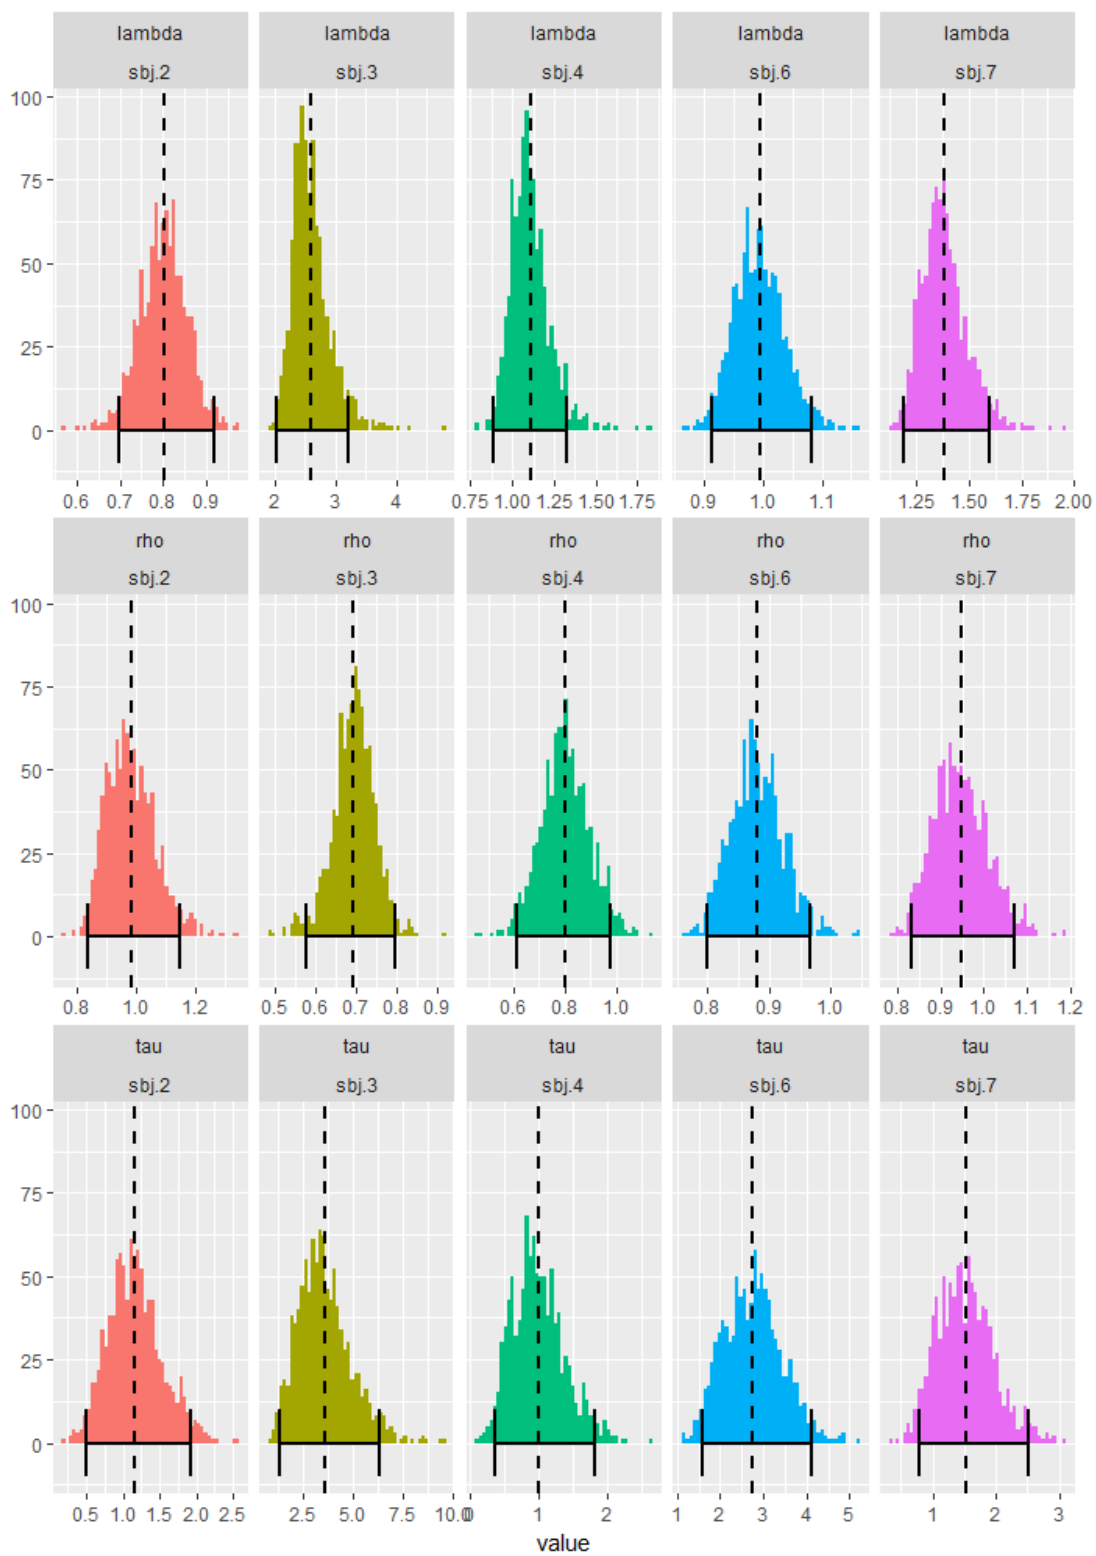

Question.1

I don't know why(I guess it's my laptop), but sampling in retention model seems to take extremely long time and I couldn't wait until it is done. Thus, I couldn't get a valid result. I completed codes for m4, graphs for posterior distributions and LOOIC, but without checking their validity.

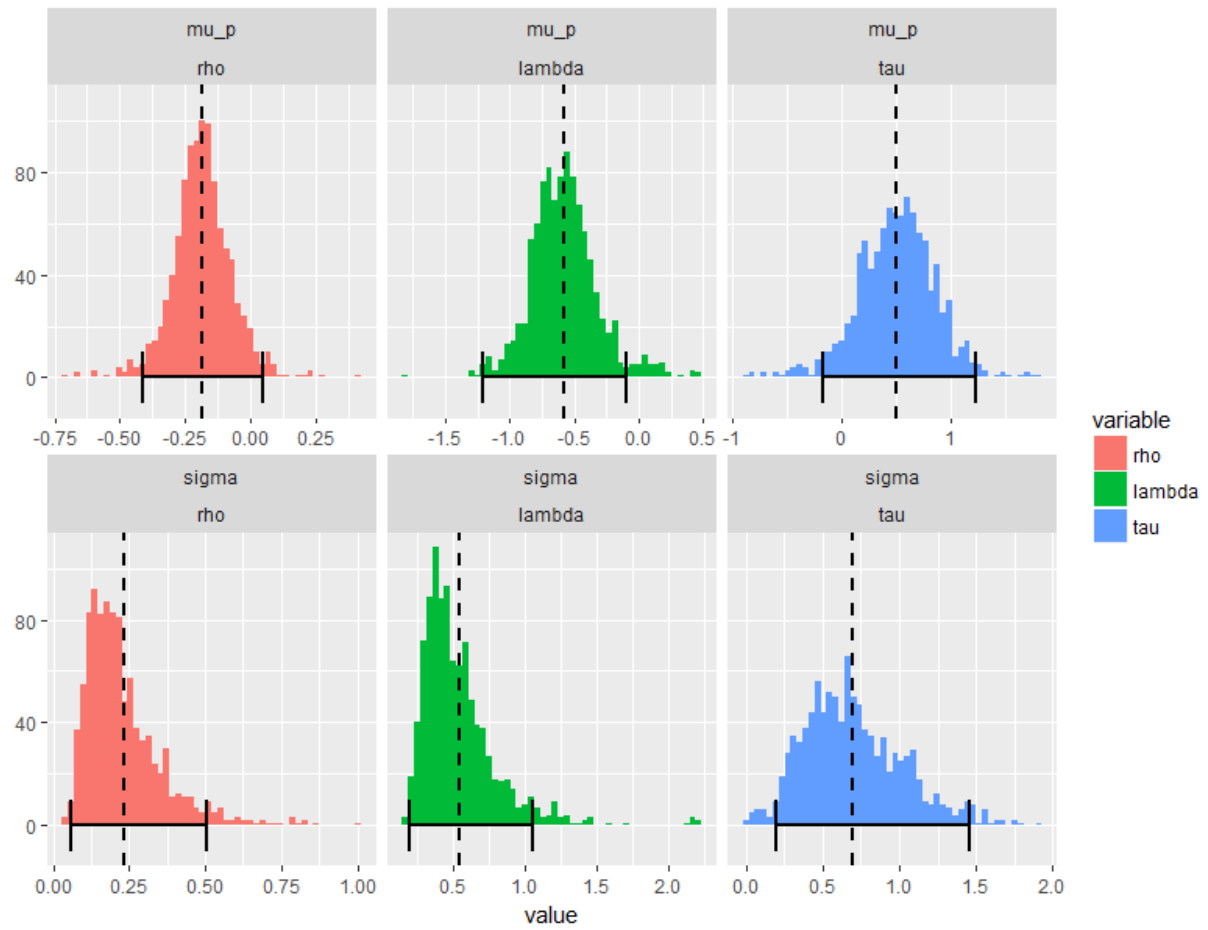

Question.2

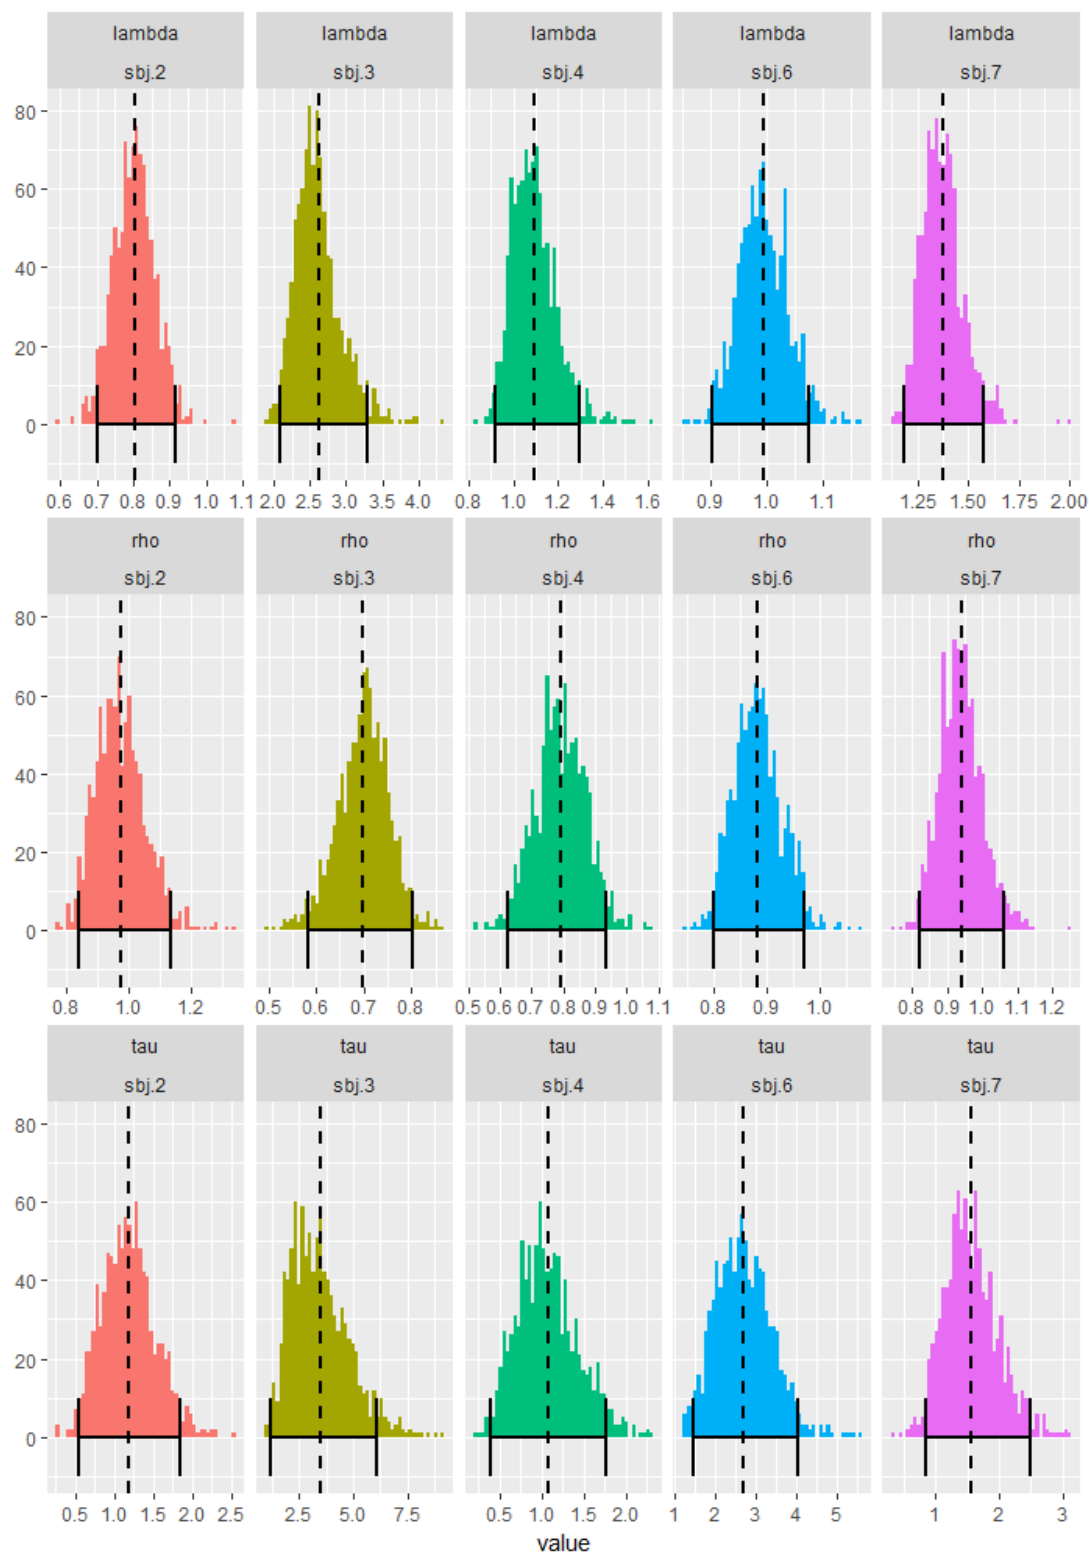

Graph for ra_prospect_w_reparam.stan

Graph for ra_prospect_w_reparam_a.stan

Graph for ra_prospect_w_reparam_b.stan
